

# Perfectly concealed ...

*Invisible brackets for visible results.*

*Lingual brackets on the inner surface of the teeth*

## **2D** Lingual brackets

*Lingual brackets are bonded onto the inner surface of the teeth which conceals them from the outside.*

*Our 2D® lingual brackets stand out from the competition due to their unique flat design. They are barely noticeable to the patient and provide the best invisible patient comfort. All that remain visible are the successful results of the treatment!*
